ABOUT ME

As a junior web developer at Tickbird, I have been working with the Angular framework for over a year, developing the company website and learning new tools along the way. I have a certificate from Udemy in The Complete Web Developer in 2022: Zero to Mastery, which demonstrates my commitment and passion for web development.

Before joining Tickbird, I gained valuable experience as a junior web developer at FrozenLogic, where I created reusable web modules that matched perfectly with the design, using HTML, CSS, JavaScript, Figma, Jira, Avocode and HubspotCMS. I worked in an agile team, delivering projects for clients from various sectors, such as agriculture, software, and finance. I enjoy solving problems, learning new things, and working collaboratively with others.

I discovered my passion for web development by completing the web development course at Informal School of IT in 2020 where I learned all the basics about front-end and got a taste about React which is currently my favorite stack.

HOBBIES AND INTERESTS

Hobbies

I like programming and fitness. Living in the countryside I enjoy long walks through the forest with my dogs. I'm a huge Formula 1 and MotoGP fan and I always make sure to not miss any race. When time allows, I enjoy riding my motorcycle or playing racing video games.
