WORK EXPERIENCE

[27/08/2022 – Current]

Junior Web Developer

Tickbird

City: Cluj-Napoca

Country: Romania

At Tickbird I first started working with a framework, this time with Angular. The methodology remained AGILE.

The main project I worked on was the company website, a project where I learned while working. In addition to HTML and CSS, already known languages, I also worked with Typescript, Bootstrap and AOS.

[16/08/2021 – 16/08/2022]

Junior Front-End Web Developer

FrozeLogic SRL

City: Remote

Country: Romania

FrozeLogic was my first company in the IT industry. The main task was to develop reusable web modules that match perfectly with the design, using the tools and frameworks agreed. Here I learned a lot of CSS and its tricks, also HTML and JavaScript.

We were working in AGILE methodology. After we received the project (design), we made the planning in a meeting and then assign the tasks.

The content on each page could be edited from HubspotCMS, we were taking care of the page structure and the way it appears but also the available fields in CMS, basically presentation pages.

The clients were from various sectors: agriculture, software, finance, etc.

Here I learned to work with tools like HubspotCMS, Figma, Jira, Avocode and HubL syntax.

[07/10/2019 – 11/08/2021]

Senior Account Payable Analyst

Genpact

City: Cluj-Napoca

Country: Romania

I felt the need for a change, to see what the organizational culture is like in a different company. The basic activity was about the same, only the invoice processing system was different. As a side activity, I was doing a quality check for my colleagues to verify the correctness of the invoice postings.

[01/06/2018 – 04/10/2019]

Account Payable Analyst with German

Boonbarrier Transportation

City: Cluj-Napoca

Country: Romania

After 13 months in the Scanning team I got promoted to the AP where I was working in a team of 23 people. Here, the main task was to process invoices in SAP by checking that all invoicing requirements are met by our vendors.

As secondary tasks, I was the owner of the Interco Process (invoices from BT Germany to BT Germany) and I was involved in Interco process as well (invoices from foreign BT to BT Germany).

[22/02/2017 – 31/05/2018]

Scanning Analyst

Bombardier Transportation

City: Cluj Napoca

Country: Romania

As a scanning analyst, the primary activity was to scan invoices. These invoices arrived at the office by post or email. Then, we had to sort these invoices according to different criteria (PO, non-PO, country, etc.) and in the last phase we had to make sure that the invoices reached the AP department's processing system by scanning itself.

One of the important secondary activities was archiving invoices and sending them to the headquarters.
